

Overview

SGFinDex is the world's first public digital infrastructure to use a national digital identity (Singpass) and centrally-managed online consent system to enable individuals to access, through applications, their financial information held across different government agencies and financial institutions.

Centralised gateway for **efficient and secure data sharing** based on common data standards

A government-owned and -operated infrastructure that **uses Singpass authentication and consent framework**

Enables **data-driven innovations** and **integrated digital financial services**

How does SGFinDex work?

1

Myinfo financial data

Financial data

Access

www.mymoneysense.gov.sg or any participating bank/ insurance platform to **connect your financial institutions to SGFinDex**

- You may disconnect any linked financial institutions at any time

2

singpass
User consent

Encrypted data package

Financial planning platform

Retrieve

your financial information from participating financial institutions and Myinfo securely

- Provide consent to retrieve your personal data through SGFinDex
- SGFinDex passes encrypted data to the financial planning platform, which decrypts and displays the data for you

Safeguards to ensure data protection and privacy of personal financial information

User identity is verified via Singpass, before any personal financial data is retrieved

Explicit user consent is required for each data retrieval

SGFinDex **only transmits; does not read and store any data**
